published online 23 January 2020

Following publication of this article, the authors noticed an error in Supplementary Table 1. In the original Supplementary Table 1, one of the criteria for control participants

was incorrectly given as ‘Report extensive recent symptoms of depression: less than **14** on summed response (where “not at all” = 1 and “nearly every day” = 4) to recent’. This has now been corrected to: ‘Report extensive recent symptoms of depression: less than **5** on summed response (where “not at all” = 1 and “nearly every day” = 4) to recent’.
